### **GUARANTEED ANALYSIS**

26.00% Urea Nitrogen' Soluble Potash (K<sub>2</sub>0).

Derived from urea, potassium chloride, polymer coated sulfur coated urea. \*3.90% Slowly Available Urea Nitrogen from Polymer Coated Sulfur Coated Urea

Information regarding the contents and levels of metals in this product is available on the internet at https://aapfco.org/metals

Nitrogen Notice For those states with nitrogen application restrictions, including but not limited to MD, NH, NJ and VA, do not apply more than 2.8 lbs. of this product per 1,000 sq.ft.

> **PRECAUTIONARY STATEMENTS Hazards to Humans and Domestic Animals** Keep Out of Reach of Children CAUTION

Causes eye irritation. Harmful if inhaled. Avoid contact with eyes or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Prolonged or frequently repeated skin contact while handling this material may cause allergic reaction

F002091

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contacts, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor for treatment advice. Have person sin a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-757-8951 for emergency medical treatment information.

This product is toxic to fish and highly toxic to other aquatic organisms including oysters and shrimp. Use with care when applying to turf areas adjacent to any body of water. Drift and runoff from treated turf may adversely affect aquatic organisms in adjacent aquatic sites. Do not apply when weather conditions favor drift from treated areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

# irections For Use

It is a violation of Federal law to use this product in any manner inconsistent with its labeling. Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

New York Use Restrictions: Do not apply more than 5.6 pounds of this product per 1,000 square feet of turfgrass area per year. Do not make more than one application per year. Use only according to label instructions.

### GENERAL INFORMATION

This product is a combination product that provides both crabgrass control and the required nutrients for optimum turfgrass growth all in a single product.

This product contains Dimension", a crabgrass preventer that can be applied up to 4 weeks later than other crabgrass preventers and provides up to 4 months control of crabgrass and other grass and broadleaf weeds prior to their establishment in lawns and ornamental turfgrasses. This product should be applied to lawns and ornamental turfgrasses that are well established (See "Use Precautions" section below for a list of the tolerant turfgrasses). This product will not harm nearby established ornamentals when used according to label

This product should only be applied to lawns and ornamental turfgrasses that are well established. Use of this product on lawns and ornamental turfgrasses that are not well established, or have been weakened by stress due to mechanical operations, pests, excessive temperatures, or lack of moisture may increase the chances for turfgrass injury.

This product can be applied to the following turfgrasses when applied as directed

Cool-Season Turfgrasses	Warm-Season Turfgrasses		
Creeping Bentgrass	Bahiagrass	St. Augustinegrass	
Fine Fescues	Bermudagrass	Zoysiagrass	
Kentucky Bluegrass	Buffalograss		
Perennial Ryegrass	Carpetgrass		
Tall Fescues	Centipedegrass		

This product should be applied in the spring or fall prior to the weed seed germination in established lawns and ornamental turfgrasses

This product can be applied up to 4 weeks later than other crabgrass preventers and still provide season-long weed control of crabgrass. Dimension herbicide provides preemergence control of crabgrass and other weeds when applied prior to their germination, and it also provides postemergence control of crabgrass. The postemergence control provided by this product is limited to crabgrass only and will provide control of crabgrass when applied up to 4 weeks after crabgrass germination. Application of this product later than 4 weeks after crabgrass germination will result in reduced control of crabgrass.

For control of other grass and broadleaf weeds, this product must be applied as a preemergent treatment. Only crabgrass can be controlled with delayed applications after germination.

Tips for Improved Weed Control: For best results, apply this product within a few days after mowing and delay further mowings after the application of this product until the lawn or ornamental turfgrass has been watered or received significant rainfall to dissolve the fertilizer granules. Improved weed control may be observed when treated lawn or ornamental turfgrass is watered or receives rainfall within a few days after application of this product.

Reseeding, Overseeding or Sprigging of turfgrasses into areas that have been previously treated with this product should be delayed until 16 weeks after application. Reseeding, overseeding, or sprigging up to 16 weeks after application may prevent the establishment of newly reseeded, overseeded or sprigged turfgrasses

- DO NOT apply more than 11 pounds of this product per 1,000 square feet of turfgrass area during the year (1,000 square feet area = 100 feet x 10 feet).
- DO NOT apply to flowers, vegetables, or fruit trees.
- DO NOT use clippings from treated turf for mulching around flowers, vegetables or fruit trees.
- Keep people and pets off treated areas until dust has settled.

# APPLICATION DIRECTIONS

This product will provide control of crabgrass and other grasses and broadleaf weeds listed below when applied prior to weed seed germination in established lawns and ornamenta

# Weeds Controlled and/or Suppressed by This Product

Grass Weeds:		<b>Broadleaf Weeds:</b>	
Annual Bluegrass	Green Foxtail	Bittercress	Creeping Oxalis
Annual Ryegrass	Kikuyugrass (seedling)	Buttercup Oxalis	Henbit
Barnyardgrass	Perennial Ryegrass	Carolina Geranium	Parsley-piert
Crabgrass	Smutgrass (seedling)	Chickweed	Pineappleweed
Crowfootgrass	Yellow Foxtail	Common Lespedeza	Spotted Spurge
Goosegrass		Common Purslane	Yellow Woodsorrel
		Corn Spoodwall	

# Application Timings:

This product may be applied either in the spring or in the fall for the control of weeds.

When this product is applied in the fall, a sequential or second application should be made the following spring to provide season-long control of weeds.

This product will provide up to 4 months of weed control if applied according to label directions.

The actual length of control will vary depending on use rate, weather conditions, condition of the turfgrass, intensity of weed pressure, and the location or "Region" within the United

Please check the map to the right to determine which "Region" of the U.S. that applies to your particular use area.

# Use "Regions" within the United States:

# STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

STORAGE: Keep container closed and away from food, feedstuffs and domestic water supplies.

**If empty**: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

# SUGGESTED SPREADER SETTINGS

IMPORTANT: It is important to follow the directions on this quality lawn care product as over-application may cause injury to the lawn. Measure the size of the area to be treated and do not over or under apply. Spreader settings are approximate. Differences may occur due to condition of spreader, speed at which applied and roughness of area treated. Calibrate spreader prior to use according to the manufacturer's directions. Check frequently to be sure equipment is working properly and distributing uniformly. Close spreader when filling, stopping or turning, DO NOT HAND SPREAD.

# **BROADCAST SPREADER SETTINGS**

For best results, apply in a circular path starting on the outside and working toward the center (see diagram below). A little overlap of product will ensure complete coverage.

Spreader	Rate	Rate	Rate	Rate
The Andersons Yard Star 2150 (0-30)	13 1/2	15	15 1/2	17
Agri-Fab Broadcast (1-10)	4	5	5 1/4	6 1/2
